

AAA TECHNOLOGY & SPECIALTIES CO., INC.

SERIES E100

TYPE F

1. The casing diameters shown for each spring hanger size are for all Types of spring hangers.
2. The casing lengths shown are for Types A, B, C, D, E and G only.
3. The installed lengths are given for the mid range load settings.
4. Guided load columns are available for cases where significant lateral loads are applied to the spring hanger.
5. When significant lateral loads are applied to the spring hanger, low friction load bearings can be adhered to the load flange and the mating member above the load flange or a roller can be used to allow pipe movement.
6. Extended load columns are available where taller installed lengths are required.
